OmegaFlex, TracPipe, CounterStrike and AutoFlare are registered trademarks of OmegaFlex, Inc.

Four Decades of Performance

Since 1975, Omega Flex, Inc. has led the piping industry with its high-quality construction and commitment to exceed the industry's product and safety standards.

• With over 100 patents, OmegaFlex's philosophy is not to wait for mandates, but to lead the industry by introducing the best products.

• In 1999, OmegaFlex was the first CSST manufacturer to mandate the bonding of its yellow-jacketed TracPipe® Corrugated Stainless Steel Tubing (CSST) in its installation guide.

• In 2004, OmegaFlex developed CounterStrike® CSST, which contains all of the innovative features of TracPipe® CSST plus a built-in arc resistant jacket that eliminates the need for additional bonding. Subject to applicable local codes.

• In 2011, OmegaFlex became the only CSST manufacturer to transition from its highly successful yellow CSST product "TracPipe®" CSST and now only sells its innovative black-jacket product "CounterStrike®" CSST throughout the US market.

• In 2012, OmegaFlex was a sponsor of NSF-UC San Diego's earthquake testing program. The flexibility of CounterStrike® CSST withstood the worst seismic activity simulated without any failures, leaks or damage. Meanwhile black iron pipe, which was installed next to CounterStrike® CSST, fractured in the same test.

CounterStrike® CSST is also :

• Listed by both CSA and ICC Evaluation-Services-PMG 1058 and evaluated by the International Association of Plumbing and Mechanical Officials (IAPMO) ER 0227 for lightning resistance without additional bonding (unless required by local codes).

• Compliant with fuel gas codes in all 50 states.

• Compliant with all model codes, including all the National Fuel Gas Code (NFPA), International Fuel Gas Code and International Residential Code (ICC), and the Uniform Plumbing Code (IAPMO).

• Listed to the national consensus standard for CSST (ANSI LC 1-2016) including all requirements for arc-resistant conductive jackets.

• Underwriters Laboratories (UL) listed for 1, 2 and 4 hour through penetration fire stop systems without removal of the conductive jacket.

• This catalog is not for use in Canada.

• The 2022 ICC-ES ESR-4565 listing represents the seismic certification by shake-table testing for CounterStrike® CSST flexible gas piping systems as an alternative to code-prescribed requirements. Omega Flex tubing systems sustained severe earthquake simulations that surpassed all the intensities and seismic forces ever recorded as well as the design forces specified in the current building codes. The ICC seismic certifications for the three Omega Flex products (CounterStrike®, MediTrac®, and DoubleTrac®) are consistent with the technical requirements of the major US seismic codes and standards including: International Building Code, the ASCE-7 Standard, FEMA 461 as well as the City of Los Angeles Department of Building Safety, and the State of California Division of State Architect and OSHPD.

CounterStrike® CSST in seismic test rig.

CounterStrike® CSST Piping Systems for Natural Gas and Propane

The flexibility and long lengths of CounterStrike® CSST make it perfect for remodel/repair work. It can be pulled like wire, which minimizes the need to remove and replace walls, while at the same time potentially reducing both construction cost and shortening lead times.

CounterStrike® features a single robust protective jacket over a non-annealed CSST, which offers enhanced crush resistance. The superior crush resistance of CounterStrike® CSST means that it lays straighter, is simpler to cut and pulls easier in new home construction.

CounterStrike® Flexible Gas Tubing

Corrugated Stainless Steel 300 Series with Black Conductive Jacket

Plywood Reels for Packaging

Note: Other lengths available. Consult factory for price and lead time.

CounterStrike® CSST Coils

CounterStrike® CSST tubing coil gas piping system comes in ½", ¾", and 1" diameters. Used for natural gas or propane powered appliances the smaller coils are perfect for smaller jobs involving the replacement or relocation of a single gas appliance.

CounterStrike® Flexible Gas Tubing Coil
